Objectives

- To transfer knowledge on IPv6 deployment and operation to NRENs, Universities, commercial organisations, ISPs, governments and regulators in:
  - Southern Africa & Sub-Saharan Africa
  - SE Europe
  - Mediterranean Countries
  - South America, Central America & Caribbean
  - Asia Pacific Region
  - Newly-Independent States in Central Asia
  - India & China
Objectives

- To raise awareness of IPv6
- To work with communities and organisations in the regions
- To exchange best practices
- To try and integrate the organisations into future European projects
Approach

To take the knowledge gained and the documented results from the EU projects 6NET: [http://www.6net.org](http://www.6net.org) and Euro6lX: [http://www.euro6ix.org](http://www.euro6ix.org)

… and build a new (smaller) project, focused on sharing the experience in a practical way.
At least 8 workshops will be given to disseminate information on:

- IPv6 Addressing and Routing
- IPv6 deployment and migration strategies
- Making network services ready for IPv6: DNS, DHCP, HTTPd, SMTP, ...
- IPv6-enabled applications
- Monitoring and management tools
- Multicast, Security, QoS, Renumbering, Mobility …

The 6DISS Toolkit

- Workshops
  - (slideware + access to remote labs)
- E-learning package
- Training the Trainers
- IPv6 Technical training
- Tiger Team (helpdesk@6diss.org)
- Website
• 400 slides inherited from the G6 Group and RENATER

• 6DISS partners then:
  – harmonised the style
  – reviewed the content
  – added new topics/modules (provided by partners)
  – split them into 20 modules
    • More convenient to handle and update
    • Easier to build up a workshop programme selecting the appropriate modules.

• Each module has an owner, responsible for the updates

• Modules continue to be added or expanded (eg. lab exercises, deployment scenarios, applications, …)

Available from anywhere (accessible via http://www.6diss.org/e-learning)

Attractive content
- well-balanced combination of audio, graphical and animation components

Effectiveness is ensured through:
- an integrated instructional design, including a modular structure
- interactivity
- individual learning flexibility
- subtitles (so far, only in Portuguese)

The e-learning package is used:
- as a “teaser” for the workshops
- for assessing the suitability of participants for the workshops
- for training the trainers
We only really have budget to visit each region once (8 workshops), but we can train other people to give our workshops.

“Training the Trainers” courses can be offered in Brussels or Paris, or at your location. A “Training the Trainers” manual is available, that comprises:

- Guidelines regarding the fundamentals of teaching
- Guidelines on how to organize a workshop on IPv6
- Information on where to find the latest workshop module material
- An instructors’ guide to accompany each module
- Information on the e-learning package
- Information about the Tiger Team
- The feedback questionnaire
- Description of other material available from 6DISS
We can also give specific technical training courses in Brussels, Paris – or on site. These courses can be tuned to local requirements:

Topics can include:

- IPv6 details
- Installing and configuring IPv6 on clients
- Installing and configuring IPv6 on routers
- IPv6 routing protocols
- IPv6 transitioning with tunnels
- Multicast
- Security
- QoS
- Management and monitoring
The “Tiger Team” is a channel to experts (within or outside the project). It operates via a help desk service (helpdesk@6diss.org), concerning aspects such as:

- state-of-the-art, eg:
  - IPv6 IETF RFCs that are released or still in progress
  - IPv6 deployments
  - IPv6 applications
- how to configure equipment
- hardware and software requirements and releases
- transition scenarios
- management and monitoring tools
- applications
At www.6diss.org, you can find:

- All the presentations that have been made at the workshops and in conferences, reports from the workshops, deliverables, press releases, news, etc.
- A calendar of upcoming events especially related to IPv6, and the upcoming 6DISS workshops
- The link to the e-learning package
- Links to related sites

Workshop hosts can also download the information they need regarding the organisational details.

World Tour Programme

Workshops held so far:

- Asia-Pacific Region: Taipei, Taiwan (IPv6 Summit, 08/2005)
- Southern Africa: Port Elizabeth (TENET IPv6 workshop, 09/2005)
- S-E Europe: Serbia/Montenegro (03/2006)
- Mediterranean Countries: Malta (04/2006)
- South & Central America: Ecuador (07/2006)
- Sub-Saharan Africa: Senegal (10/2006)

“Hands-on” practical sessions supported at:

- Afrinic-3: Cairo, Egypt (12/2005)
- AfriNIC-4: Nairobi, Kenya 05/2006)

“IPv6 Trainers’ session” in Belgium (10/2006)
World Tour Programme

Done
Planned
„Extra“ events

AfriNIC-5: Mauritius – 29th November, 2006
Programme

1. Objectives and Approach
2. Key Data
3. The 6DISS Toolkit
4. World Tour Programme
5. Conclusion
Conclusions

6DISS aims to:

- Assist those regions with less IPv6 experience to deploy the latest technology in the most efficient manner
- Build contacts to organisations in these regions to support and enable their subsequent participation in projects within the EU ICT Programme. The first proposal for an extension of 6DISS – including AfriNIC – was not successful, but we will resubmit it next year
- Make European research and industrial concerns aware of the highly skilled personnel who can contribute to the urgently needed improvement of ICT infrastructures
Conclusions

The 6DISS project is achieving its objectives well, but we know that there are lots of other related initiatives. Cooperation, sharing information, … is a must

So, if you are planning an event that includes IPv6 information dissemination, training, etc., do not hesitate to get in a touch with us.

Contact us through our Website (www.6diss.org), or send a mail to helpdesk@6diss.org
Thank you for your attention
